

1. Besides the examples given in the article, what is a new technology that you are concerned may do more harm than good for the world? Cite at least one recent and relevant article related to this technology.
2. Have you been in a situation where you were concerned someone you know was conducting research or building something that may have questionable implications? Please describe the experience and remove any personally identifiable information.
3. What else struck you about this article?

1. Increased data or cookies are very concerning for me. The cookies may be used to make a more personalized online experience. Cookies keep the data from each website a user will be on when thinking about one website it is not very concerning, but most websites use these cookies. This data can be used to understand a person and once the data from multiple websites is combined the data is no longer anonymous.
2. I have not had the experience of someone close to me building something with questionable implications. I am usually reminded of the building of Frankenstein as the cautionary tale of what the lack of ethical concerns can bring about.
3. I was struck that they made an academy for younger computer scientists and their primary goal was to inform the public of the questionable ethical implications of new technology
